HOLBROOK'S
NEWARK
CITY DIRECTORY,

FOR THE YEAR ENDING

April 1, 1876.

A. STEPHEN HOLBROOK, PUBLISHER.

NEWARK, N. J. :
A. STEPHEN HOLBROOK, PRINTER, No. 11 MECHANIC ST.

1875.

PREFACE.

Little of general interest during the past year can be added to that already made known through the press. The growth of the city has been retarded by the panic, yet notwithstanding the general prostration, with increased confidence is the busy hum beginning to resound throughout the city.

The most important event during the past year was the exhibition of Newark Industries. The advantage to Newark as an advertising medium of its products is of no less importance than as a school of instruction for all classes of citizens, more especially the young, where they may study science and art. It is an educator of the people, and they will do well to foster it, especially those who realize the value of Institutions of Knowledge. From a late action of the Directors the usefulness of the exhibition is to be extended to the State at large.

As regards this work which bears a name (Directory) of no small import in a large city, and the aversion many have to be recorded therein, induces us to again present a few of the difficulties encountered, that citizens may be kept well informed and be led to assist in a reformation.

Extract from one of the first Directories published in this city *thirty-five* years ago, suggestive of the difficulties then contended with :

"There are a great many who, no doubt, will be surprised to find their names in the Directory, as they directed them to be left out, and for what reason it cannot be divined, without it is to screen them from taxes or a constable. But suppose all names, who order it, should be left out, what kind of a Directory would it be ? To such the answer is : It is the business of the Directory to get names and not to leave them out," which fact will be appreciated by all those who use the work.

So it is at the present day ; and we might add to the above reasons family difficulties. There are many who positively refuse to give their names, not wishing them to appear before the public, for *reasons best known to themselves*. In boarding houses the difficulty is great. Instances are not few where boarders have threatened to leave if their names are given, and where they have left when they were given. Apropos to this is the case where a boarding house keeper takes a Directory, and utterly refuses to accept a boarder without his name is recorded, unless it is apparent he arrives in the city after the publication of the work. We would call attention of those who may discover the omission of any names to the above, and not unfrequently do persons, to cover this desire, give wrong information. Every name, from year to year, is made subject of inquiry, and the best information *that can be obtained* is recorded. Every endeavor is made to attain reliability, for the benefit of the community at large, as well as for the Work, and we cordially invite any information tending to that end. There would be less room for error if all classes would deem themselves equally *responsible* and desire to be recorded aright, as the Directory office is centrally located and accessible.

In the *Appendix*, pp. 817 to 920, will be found matters of interest connected with Newark, the Governments of the several surrounding Townships, pp 908 to 911 ; the State, p 862 ; the United States, p 849 ; the Federal, State and County Courts, p 856 ; also New York matters, p 919.

The *Business Directory* is added as usual, p 921. The *Advertisements* are pagged, exhibiting to the strangers the whereabouts and facilities of those in business.

A full and complete *Index* to various matters and branches of business on next page.

Holbrook's Map of Newark, similar to that accompanying this Work, may be found at the book stores, or at the *Directory Office, No. 11 Mechanic Street*.

Post Money Orders, for sums not exceeding \$50 each order, can be obtained at the principal post offices throughout the country. The use of these orders, by persons who desire to make remittances by mail, is far preferable to sending money, even when the letter containing it is registered. By the money order system, *absolute security* against loss is obtained. Money orders are good for one year from the date of issue. In case of their loss, no charge is made for the issue of duplicates. Persons sending money orders should be careful never to send them in a letter which contains the name of the person from whom they are sent. This is necessary in order to guard against loss in case the letter should fall into improper hands; money orders *never* being paid to any person who cannot tell the name of the party to whom they were issued.

As letters are frequently dropped in the letter boxes insufficiently paid, persons who are not certain in regard to weight, rates, etc., would do well to inquire of the Stamp Clerk before mailing them. If sent to the Dead Letter offices they are delayed two or three mails.

surrender to the Revolution, some continuing longer than one year, and one from 1761 to 1769, eight years. The assemblies sometimes met five or six times within a year, and once never convened for five years.

In 1774 the assembly called upon Governor Franklin to convene the Legislature for the purpose of appointing delegates to a general congress of the colonies to meet in Philadelphia. On his refusing to do so, a meeting of the people of Essex County was held at Newark in June, when notice was sent to the other counties to send delegates to a general committee to meet at New Brunswick in July. This general committee did meet, and sent five delegates to the General Congress. In the next meeting of the assembly the Governor strongly condemned the congress, but the Assembly elected five delegates notwithstanding to attend at the next meeting of the congress. A Provincial Congress of New Jersey also met in Trenton May 23, 1775, and proceeded to aid the Revolution.

On the 12th of August, 1775, the Provincial Congress enacted that all inhabitants worth fifty pounds in real or personal estate should meet at their county court house on the 21st of September, and choose any number not exceeding five to represent them in the Provincial Congress to be held at Trenton, October 3d next ensuing. The regular assembly met in November of the same year for the last time, but did not attempt to interfere with the Provincial Congress, and being prorogued by the Governor until January 3d, failed to appear on that day. Governor Franklin then ordered them to appear in the name of the King, but the Provincial Congress vetoed that measure, and in return arrested the Governor and sent him a prisoner to Connecticut.

On June 18th, 1776, the Provincial Congress ratified the Declaration of Independence, and the next day adopted the name of the "Convention of the State of New Jersey." The new Legislature met at Princeton on August 27th following, and continued in session till the 8th day of October, choosing in joint meeting, William Livingston, Governor.

The above were also Governors of N. Y. at the same time.

THE EARLY GOVERNMENT OF NEW JERSEY.

The government of New Jersey was first established by the proprietors, Lord John Berkley and Sir George Carteret, the parchment constitution bearing the date of February 10, 1664. This government continued until the division into East and West Jersey, 1676. Robert Barclay was appointed Governor of East Jersey by the proprietors for life, in 1682, and immediately by deputy convened an assembly elected by the people, which sat again in 1686, in 1688, and afterwards at irregular intervals. In West Jersey some of the Governors were appointed by the proprietors, and others by the Legislature, the latter body appointing also the other governmental officers.

In 1702, upon the assumption of the government by the Queen of England, a governor of the Province of Nova Cæsarea or New Jersey was appointed by the crown, to hold office at the pleasure of the sovereign. The Governor was assisted by twelve counselors, appointed by the crown and occasionally by himself, six from East and six from West Jersey, any five to make a quorum. The General Assembly consisted of two elected by the inhabitants and householders of the town of Perth Amboy, and ten by the freeholders of East Jersey; two by the inhabitants and householders of the town of Burlington, and ten by the freeholders of West Jersey. In 1709 an act was passed reciting that the constitution was inconvenient, and enacting that the majority of the votes of the freeholders of each county worth fifty pounds or owning one hundred acres of land be taken to elect representatives, who should be worth five hundred pounds or possessed of one thousand acres of land. Two were to be elected for Perth Amboy, and two for each of the then five counties of East Jersey, two for each of the towns of Burlington and Salem, and two for each of the then four counties of West Jersey. Hunterdon county, though established in 1714, continued to send representatives in conjunction with Burlington till 1727, when it was authorized to send two, and Salem town was deprived of its separate representation. Cumberland County was set off from Salem in 1747, but continued to elect representatives as before until 1768, when two additional members were added from Morris County, two from Cumberland, and two from Sussex.

In 1725 the first formal polls were opened, and a clerk was appointed to take down each voter's name, the Sheriff being ordered to keep the poll open from day to day till all had entered their names. One polling place alone was in each county, and in 1789, when East and West Jersey contended as to whether the temporary seat of Government should be at Philadelphia or New York, the polls were kept open three or four weeks. Voting by ballot was first introduced in 1779, was discontinued during the war, restored in several counties in 1783, required by law in 1790, but was not universal till 1797. There were twenty-two assemblies from the

1. On the breaking out of a fire, notice should be immediately communicated to the nearest alarm box, keys of which are always in the hands of the police and responsible persons in the vicinity of boxes.

2. Key holders, upon the discovery or positive information of a fire, will unlock box, pull down the slide or hook once, *and let go quick*. This gives the desired alarm all over the city, repeating itself four times.

3. All persons giving the fire alarm are requested to remain by the box a moment, and if no clicking is heard in the box, pull again; if you still hear no clicking, go to the next nearest box and give the alarm from that.

4. Never signal for a fire seen at a distance; never touch the hook except to give the alarm of fire; be sure the box is locked before leaving it; give an alarm for no cause other than an actual fire; *do not give an alarm for a chimney*.

5. Owners and occupants of buildings are requested to inform themselves of the location of signal boxes near their property; also where the keys are kept. Be sure the alarm is properly given; one single stroke of the house gongs is not given for an alarm of fire.

6. Second alarm for the same fire can only be given by the Chief Engineer, or one of his assistants.

7. Alarms will be sounded upon the alarm bells thus: For Box Thirty-two, three strokes—1—1—1, and a pause, then two strokes—1—1, a longer pause and repeating. Alarms for other numbers are given in a like manner.

} Principals.

Over Mulligan's Bookstore.

The sixth year of the School opens on Monday, Sept. 13, 1875. Its aim is to prepare boys for College, and to do this in a most thorough manner. We have nothing to do with the popular superficial methods, which are only calculated to flatter parents with an empty show of progress in their children, but leave no lasting impression. We wage bitter war against all educational humbug, of whatever description. We do not use the time which ought to be devoted to hard work for the preparation of showy exhibitions at the close of the academic year. The real exhibition of the students consists of the daily labors of the School-room, and parents are cordially invited to drop in at any time, and see our system. It presents a combination of the best features of the European and American methods of instruction; and we confidently claim that the School is not surpassed by any institution in the United States. The number of scholars is constantly increasing, and we are patronized by those classes of Newark's citizens which stand highest in the scale of true culture and literary refinement.

SHEPARD'S

Steel Spring Bed Bottom.

Patented July 26th, 1870.

MANUFACTURED AND SOLD WHOLESALE AND RETAIL, BY

ROBERT MILLEN,

No. 30 Ward Street, Newark, N. J.

For EASE, SIMPLICITY and DURABILITY, we challenge comparison with any other Spring Bed. It forms a luxurious bed with but a single mattress. It is CLEANLY, giving no harbor to vermin. More than FIVE HUNDRED families in this City are using this Spring Bed Bottom. IT COSTS YOU NOTHING FOR A TRIAL, and can be attached to any sort of Bedstead.

Below we give a few of the many Testimonials we have received:
